IS A NEW JACKET MADE OF SOFTSHELL, A NEW TYPE OF MATERIAL that, due to its special structure and use of a wind-blocking elastic membrane provides three key features: Wind protection, water protection (up to 8000 ml.) and breathability. It is extremely soft, very elastic and waisted, following the lines of the body, making it particularly comfortable. Removable sleeves, adjustable wrists with velcro closure, front pockets with zipper.

UNA NUOVA GIACCA REALIZZATA IN SOFTSHELL, UNA NUOVA CATEGORIA DI TESSUTO, che grazie alla particolare struttura ed alla speciale membrana elastica incorporata garantisce tre caratteristiche fondamentali: protezione al vento (windstopper), protezione all'acqua (8000 ml colonne d'acqua) e traspirabilità. L'estrema morbidezza, l'ottima elasticità e le sciancrature che seguono le linee del corpo la rendono particolarmente confortevole. Maniche removibili, regolazione del polso con chiusura in velcro, tasche frontali con cerniera.

BOOTS / STIVALI

## THE ACERBIS PROTECTIONS ARE ALL CERTIFIED AND HAVE MET AND EXCEEDED EN 1621 REQUIREMENTS.

The new certification ensures that the protection absorbs shocks and impacts simulated in a laboratory to equal those that would occur in a real life situation. In order to meet this standard, the back protector is subject to a series of strict tests:

- 1)** The standards provides security as a fundamental element of the minimum size of the protection zone. Dimensions and position of the guards must be stated on the label and separate information note included, provided by the manufacturer.
- 2)** An anatomical test verifies that it protects several parts more likely to be subjectes to serious injuries such as spine and shoulder blades.
- 3)** The protection is conditioned for 72 hours at both room temperature and at 50°C to simulate the aging process of protections. To guarantee the protection capabilities of the product, guards must be tested for impact, put through various simulations to test its ability when impacted with sharp or blunt objects.
- 4)** Chemical tests are carried out on the products, to ensure complete harmlessness of the materials on the person.
- 5)** A special pictogram showing the certification must be clearly visible on the product packaging.

## LE PROTEZIONI ACERBIS SONO TUTTE OMOLOGATE E QUINDI PROGETTATE PER SUPERARE L'OMOLOGAZIONE SOGGETTA ALLA NORMATIVA EN 1621

La nuova certificazione garantisce che le protezioni assorbano gli urti, simulando in laboratorio impatti uguali a quelli che si avrebbero ad esempio contro i marciapiedi. Per poter superare questa norma il paraschiena è soggetto ad una serie di test più severi e impegnativi rispetto al passato:

- 1)** La norma fornisce come elemento fondamentale di sicurezza le dimensioni della zona di protezione. Dimensioni e posizione delle protezioni devono essere incluse nelle informazioni fornite dal fabbricante tramite etichetta sulla protezione ed una nota informativa allegata alla protezione.
- 2)** Viene fatto un test anatomico per verificare che la protezione ripari effettivamente le parti più soggette a lesioni gravi, come spina dorsale e scapole.
- 3)** La protezione viene anche condizionata per 72 ore sia a temperatura ambiente che a 50°C, per simulare l'invecchiamento delle protezioni. Quindi a garanzia della capacità di protezione del prodotto, le protezioni devono essere sottoposte a prove di impatto, eseguite in modo da replicare i pericoli derivanti dall'urto con bordi taglienti, come per esempio i cordoli di marciapiede.
- 4)** Test chimici vengono effettuati sui prodotti, per garantire la completa innocuità dei materiali della protezione, sulla persona.
- 5)** Sia sul prodotto che nell'imballaggio deve essere, ben visibile, un apposito pittogramma che dimostra l'omologazione della protezione.

## X-FACTOR HANDGUARDS

€ 139,95

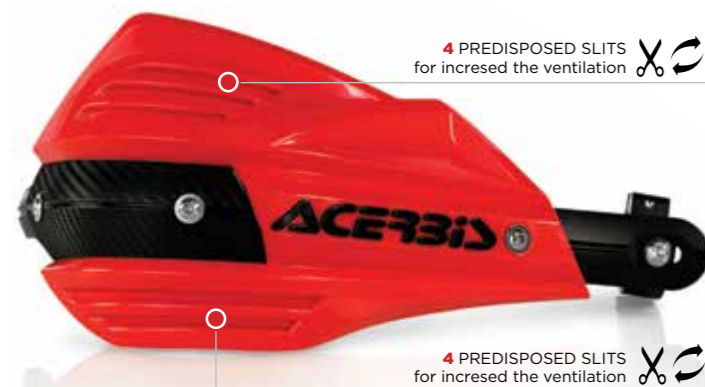

X-Factor is the new ultra-resistant handguard made for people looking for more protection, in extreme enduro, but also for maxi-enduro users. Featured with an ANTICORODAL bar with a "C" section 35 mm. (1), that ensures a resistance 5 times higher than a classic aluminum handguard. The bracelet has an increased thickness from 15 mm to 19 mm (2), offering not only increased rigidity, but also increases torsional strength, this is guaranteed by the expander made entirely of steel. The broader bi-injection cover protects (3) almost all of the riders hands. Finally the pre-shaped slits allow increased the ventilation (4).

APPLICATION: All off-road aluminum handlebars with an internal diameter of 13.5 mm. to 16 mm. and an outside diameter of 22 mm. Fatbar and Twinwall with an external diameter of 28 mm.

X-Factor è il nuovo paramano ultrasensibile indicato per chi è alla ricerca di una maggiore protezione sia tra gli enduristi più estremi sia tra gli utenti delle maxi-enduro. Dotato di una barra in ANTICORODAL a sezione "C" da 35 mm. (1) garantisce una resistenza 5 volte superiore rispetto a un classico paramano in alluminio. I braccialetti, aumentati nello spessore, passano da 15 mm. a 19 mm. (2) maggiore solidità, quindi, ma anche incremento della capacità torsionale garantita da expander realizzati completamente in acciaio. La cover a bi-iniezione più ampia (3) protegge maggiormente le mani del pilota. Feritoie pre-sagomate possono aumentare l'aerazione (4).

APPLICATION: tutti i manubri classici OFF-ROAD in alluminio con diametro interno da ø 13,5 mm. a ø 16 mm. diametro esterno ø 22 mm. fatbar diametro esterno ø 28 mm. e Twinwall.

- Paramano innovativo in Nylon
- **STUDIATO PER MOTOCROSS ED ENDURO CHE MONTANO POMPE BREMBO, DAI MODELLI 2014.**
- Nuovo sistema di fissaggio che sfrutta la vite delle leve.  
Duplice vantaggio: maggior rigidità e non occupa spazio dove si trovano i comandi originali.

# MX ONE 1 JACKET OFF ROAD GEAR

0017030.090.

**IS A NEW JACKET MADE OF SOFTSHELL, A NEW TYPE OF MATERIAL** that, due to its special structure and use of a wind-blocking elastic membrane provides three key features: Wind protection, water protection (up to 8000 ml.) and breathability. It is extremely soft, very elastic and waisted, following the lines of the body, making it particularly comfortable. Removable sleeves, adjustable wrists with velcro closure, front pockets with zipper.

**UNA NUOVA GIACCA REALIZZATA IN SOFTSHELL, UNA NUOVA CATEGORIA DI TESSUTO,** che grazie alla particolare struttura ed alla speciale membrana elastica incorporata garantisce tre caratteristiche fondamentali: protezione al vento (windstopper), protezione all'acqua (8000 ml colonne d'acqua) e traspirabilità. L'estrema morbidezza, l'ottima elasticità e le sciancrature che seguono le linee del corpo la rendono particolarmente confortevole. Maniche removibili, regolazione del polso con chiusura in velcro, tasche frontali con cerniera.

## THE ACERBIS PROTECTIONS ARE ALL CERTIFIED AND HAVE MET AND EXCEEDED EN 1621 REQUIREMENTS.

The new certification ensures that the protection absorbs shocks and impacts simulated in a laboratory to equal those that would occur in a real life situation. In order to meet this standard, the back protector is subject to a series of strict tests:

- 1)** The standards provides security as a fundamental element of the minimum size of the protection zone. Dimensions and position of the guards must be stated on the label and separate information note included, provided by the manufacturer.
- 2)** An anatomical test verifies that it protects several parts more likely to be subjectes to serious injuries such as spine and shoulder blades.
- 3)** The protection is conditioned for 72 hours at both room temperature and at 50°C to simulate the aging process of protections. To guarantee the protection capabilities of the product, guards must be tested for impact, put through various simulations to test its ability when impacted with sharp or blunt objects.
- 4)** Chemical tests are carried out on the products, to ensure complete harmlessness of the materials on the person.
- 5)** A special pictogram showing the certification must be clearly visible on the product packaging.

## LE PROTEZIONI ACERBIS SONO TUTTE OMOLOGATE E QUINDI PROGETTATE PER SUPERARE L'OMOLOGAZIONE SOGGETTA ALLA NORMATIVA EN 1621

La nuova certificazione garantisce che le protezioni assorbano gli urti, simulando in laboratorio impatti uguali a quelli che si avrebbero ad esempio contro i marciapiedi. Per poter superare questa norma il paraschiena è soggetto ad una serie di test più severi e impegnativi rispetto al passato:

- 1)** La norma fornisce come elemento fondamentale di sicurezza le dimensioni della zona di protezione. Dimensioni e posizione delle protezioni devono essere incluse nelle informazioni fornite dal fabbricante tramite etichetta sulla protezione ed una nota informativa allegata alla protezione.
- 2)** Viene fatto un test anatomico per verificare che la protezione ripari effettivamente le parti più soggette a lesioni gravi, come spina dorsale e scapole.
- 3)** La protezione viene anche condizionata per 72 ore sia a temperatura ambiente che a 50°C, per simulare l'invecchiamento delle protezioni. Quindi a garanzia della capacità di protezione del prodotto, le protezioni devono essere sottoposte a prove di impatto, eseguite in modo da replicare i pericoli derivanti dall'urto con bordi taglienti, come per esempio i cordoli di marciapiede.
- 4)** Test chimici vengono effettuati sui prodotti, per garantire la completa innocuità dei materiali della protezione, sulla persona.
- 5)** Sia sul prodotto che nell'imballaggio deve essere, ben visibile, un apposito pittogramma che dimostra l'omologazione della protezione.

# X-FACTOR HANDGUARDS

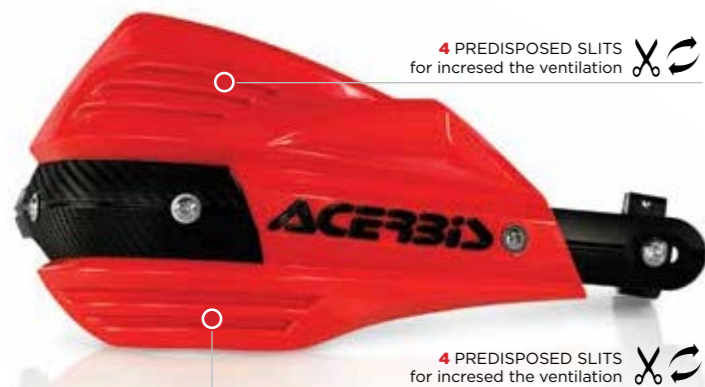

€ 139,95

X-Factor is the new ultra-resistant handguard made for people looking for more protection, in extreme enduro, but also for maxi-enduro users. Featured with an ANTICORODAL bar with a "C" section 35 mm. (1), that ensures a resistance 5 times higher than a classic aluminum handguard. The bracelet has an increased thickness from 15 mm to 19 mm (2), offering not only increased rigidity, but also increases torsional strength, this is guaranteed by the expander made entirely of steel. The broader bi-injection cover protects (3) almost all of the riders hands. Finally the pre-shaped slits allow increased the ventilation (4).

X-Factor è il nuovo paramano ultrasensibile indicato per chi è alla ricerca di una maggiore protezione sia tra gli enduristi più estremi sia tra gli utenti delle maxi-enduro. Dotato di una barra in ANTICORODAL a sezione "C" da 35 mm. (1) garantisce una resistenza 5 volte superiore rispetto a un classico paramano in alluminio. I braccialetti, aumentati nello spessore, passano da 15 mm. a 19 mm. (2) maggiore solidità, quindi, ma anche incremento della capacità torsionale garantita da expander realizzati completamente in acciaio. La cover a bi-iniezione più ampia (3) protegge maggiormente le mani del pilota. Feritoie pre-sagomate possono aumentare l'aerazione (4).

APPLICATION: All off-road aluminum handlebars with an internal diameter of 13.5 mm. to 16 mm. and an outside diameter of 22 mm. Fatbar and Twinwall with an external diameter of 28 mm.

APPLICAZIONE: tutti i manubri classici OFF-ROAD in alluminio con diametro interno da ø 13,5 mm. a ø 16 mm. diametro esterno ø 22 mm. fatbar diametro esterno ø 28 mm. e Twinwall.

The previous version has been optimized by the attachment to handlebars, design of the spoiler that follow the shape of the hand for optimum protection in all conditions. Made of nylon, with newmetal insert to avoid rotation in the event of a fall. Supplied with universal mounting kit, made of AntiCorodal aluminum, preformed shape to avoid collision with master cylinder and clutch.

• **FIT HANDLEBAR DIAMETERS FROM 22 TO 28 mm.**

*E' l'evoluzione della versione precedente, sono stati ottimizzati i punti di fissaggio al manubrio e il disegno dello spoiler che segue la forma della mano per garantire una protezione ottimale in tutte le condizioni. Realizzato in nylon, con inserto in metallo nella zona di fissaggio per aumentare la resistenza alla rotazione in caso di caduta. Fornito con kit di montaggio universale, realizzato in alluminio AntiCorodal dalla forma presagomata per non ingombrare la pompa freno e frizione.*

• **DIAMETRI MANUBRO COMPATIBILI DA 22 A 28 mm.**
